Contents

0.1	Build solution	1
0.2	Exit any program*	1
0.3	Run/execute program	1
0.4	Undo*	2

This document contains useful keyboard shortcuts for different operating systems and IDEs.

* = these commands work generally everywhere, beyond your IDE.

More advanced shortcuts may be available to your particular IDE:

- For Visual Studio, refer to the documentation¹,
- For Rider, refer to the documentation²,
- For MonoDevelop, you can refer to this cheatsheet³ or directly access the key binding panel⁴.

0.1 Build solution
