## Contents

|     |                               |   |
|-----|-------------------------------|---|
| 0.1 | Build solution . . . . .      | 1 |
| 0.2 | Exit any program* . . . . .   | 1 |
| 0.3 | Run/execute program . . . . . | 1 |
| 0.4 | Undo* . . . . .               | 2 |

This document contains useful keyboard shortcuts for different operating systems and IDEs.

\* = these commands work generally everywhere, beyond your IDE.

More advanced shortcuts may be available to your particular IDE:

- For Visual Studio, refer to the documentation<sup>1</sup>,
- For Rider, refer to the documentation<sup>2</sup>,
- For MonoDevelop, you can refer to this cheatsheet<sup>3</sup> or directly access the key binding panel<sup>4</sup>.

## 0.1 Build solution

| OS      | Keys             |
|---------|------------------|
| Linux   | Ctrl + Shift + B |
| MacOS   | Cmd + B          |
| Windows | Ctrl + Shift + B |

## 0.2 Exit any program\*

| OS      | Keys                 |
|---------|----------------------|
| Linux   | Alt + F4 or Ctrl + q |
| MacOS   | Cmd + q              |
| Windows | Alt + F4             |

## 0.3 Run/execute program
